## Rondo: The Divisors of Seventy Two

## For Two Bass Recorders (with F\# keys) and Treble or Glarken

In 'Journey to the Heart of Music' Chapter 13, an example of computational number processing is provided both in the form of computer code and tonal sound. The music below is an attempt to illustrate that the 'dry' chord progressions of this rather theoretical example could be incorporated in to a piece of normal common practice tonal music: thereby exemplifying the contention, that all tonal music is, fundamentally, arithmetic.

Rosebay Music Archive No. 530

Rosebay Music Archive No. 530

2.7-Cmaj 2.8-Cmaj Thus the divisors of seventy-two are:
$8 \times 9,6 \times 12,4 \times 18,3 \times 24,2 \times 36 \& 1 \times 72$.
